**ORA4**

**Pro Audio for the People.**

ORA4 takes the legacy of ORA to the next level by pushing bass extension even deeper while maintaining the same, great, reference-quality sound. Leaning further into the world of pro audio, ORA4 offers a flat, full-range frequency response to ensure mixes are dialed-in, and music sounds true-to-life. USB-C gives you a bit-perfect connection to your PC or Mac, Bluetooth 5.0 lets you wirelessly stream from a phone or smart home device, and RCA allows you to connect analog gear. When a subwoofer is plugged in, ORA4 automatically applies a high-pass filter to the 4" woofers keeping distortion at bay. ORA4 takes a no-nonsense approach to delivering studio-grade sound with modern features at a manageable size - perfect for nearly any scenario you throw it in.

**MATTE BLACK**

**MATTE WHITE**

## PRO SOUND

If your speakers aren't neutral, you're not hearing what the artist intended. Delivering 140 W of DSP-tuned, bi-amplified Class-D power, ORA4 produces studio-grade sound with deep, authoritative bass from its 4" woofers. Accurate enough to work as a studio monitor and refined enough for HiFi use.

## JACK OF ALL TRADES

Equal parts bookshelf speaker, studio monitor, and computer speaker. ORA4 feels equally at home in virtually any scenario and is perfectly sized for any stand mount or desktop setup. Great sound in a compact package for gamers, creators, musicians, and audiophiles.

## MODERN CONNECTIONS

To cover your digital and analog needs, ORA4 offers three inputs - USB-C for flawless sound from your PC or Mac, Bluetooth 5.0 for pairing with your phone or smart home device, and RCA for your analog gear. An endless amount of audio sources work with ORA4 from the past, present, or future.

## SUBWOOFER INTEGRATION

You don't have to sacrifice fidelity for low-end grunt. When a subwoofer is connected, a crossover network activates automatically, allowing ORA4 to concentrate on vocals and high frequencies. By offloading bass, ORA4 can play louder with less distortion improving overall sound quality.

## MOUNTING OPTIONS

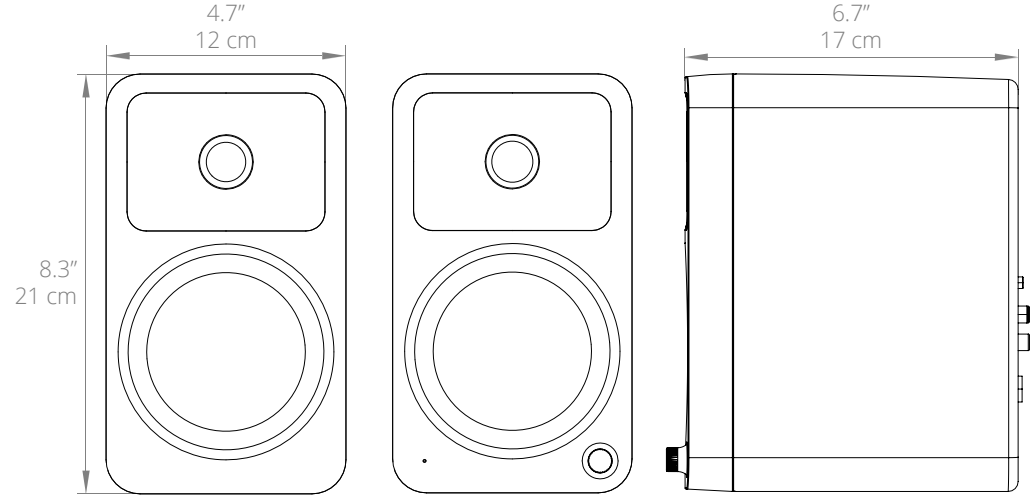

Two 1/4"-20 threaded inserts located at the rear, and bottom, of each speaker let you secure ORA4 to any compatible speaker mount or bracket. Whether you want to free up space by mounting them on a wall, or simply find the perfect spot in your room, you have the flexibility to place them wherever works best.

## PIXEL PERFECT

Placing a magnet beside your tube TV is a sure-fire way distort picture quality and lower its HP. ORA4's woofers are magnetically shielded allowing you to place them beside your CRT or PVM without any worries. The RCA input gives you a direct connection to hear your favourite retro soundtracks in all their glory.
